

Drive revenue and growth by filling open positions quickly with the best qualified candidates.

Fill hard-to-recruit roles quickly. Recruitment Accelerator automates low-value recruitment activities, freeing time for your recruiters to market your organization targeting the best candidates. End-to-end process support for HR and Hiring Managers drives a quicker, more consistent recruitment process. Built in reporting improves transparency so that the recruiting pipeline can be understood, allowing gaps to be proactively identified and closed.

## Human-resource software for Microsoft® Dynamics CRM

### Fill hard-to-recruit roles quickly

Market your organization to the best candidates using built-in analytics.

### Automate low value recruitment activities

Keep recruiters working with candidates you actively want to recruit, and automate everything else.

### Drive consistent recruitment processes

Business Process Flows manage the recruitment process to fast track the best candidates.

### More transparent reporting

Move from historic to predictive reporting to better manage the pipeline of candidates.

**Recruitment Accelerator** Skills shortages make it harder than ever to attract the best talent. Open positions negatively impact your bottom line, reducing revenue and slowing growth. HR departments and Hiring Managers need to work together to market open positions to the best candidates. Once an application is received they must fast-track the best candidates quickly through recruitment processes that showcase the best aspects of your organization.

Recruitment Accelerator is a tool that automates the process of recruitment, freeing time for recruiters to work with the best candidates. Using built-in Business Process Flows, the system takes the candidate quickly through a high-touch consistent process.

Dashboards and an easy-to-use integrated reporting tool support the management of recruitment. The pipeline of qualified candidates is transparent, allowing gaps to be predicted and proactively managed before they impact operations. The solution is as easy to use as Microsoft Outlook — a quick learning curve that reduces training expenses.
