

A safer workplace and healthier staff starts with better software

Marshal™ helps you manage people and equipment, track incidents, ingrain your processes and centrally analyze data to reduce risk and downtime.

Efficiency software for Microsoft® Dynamics CRM

Custom information and reporting for quick access

Create custom dashboards to quickly access information by location, employee or incident.

Simple employee profile management

Input and log employee communication, actions, incidents and training certificates.

Complies with Alberta/NWT Safety Standards

Alberta & NWT safety standards are some of the most rigid standards in Canada. With Marshal, you immediately comply with the highest safety standards for your industry.

Marshal™ Managing accurate OH&S (occupational health and safety) records has never been more important. Marshal lets you arm your safety champion with a simple, cost-effective, highly flexible system to capture, track, and manage OH&S requirements.

For employees, Marshal is as easy to use as Microsoft Outlook — a quick learning curve that reduces training expenses. Managers can set alerts, track, approve, notify and distribute safety information from a single interface. At the office or in the field, managers can view Marshal's analytics within Outlook, export data to Excel or SharePoint, and integrate with Microsoft Dynamics CRM, GP, and SQL server databases.
